PhoJoy is a dynamic and interactive photo viewing platform. The below instructions are for the Netbeans IDE.

Instructions to run:
1. Clone the github repo https://github.com/sasinghi/PhotoVis.git
2. Open the project in Netbeans and set it as the main project.
3. PhotoViewer.java is the class you must run.
    1. Go to Run>Set Project Configuration>Customize.
    2. Set the Main class and in the Arguments, give the path to the folder containing the test images.

    3. Click OK

4. Run the main project by pressing  or F6.
